About Us

BDB Metal, a leading company in this industry in Turkey, produces and markets metal waste containers, excavation containers, and recycling bins in various sizes at its factories in Istanbul and Ankara. Serving numerous municipalities, hospitals, universities, public institutions, and recycling companies within Turkey, BDB Metal also exports to several countries abroad, including Lithuania, Azerbaijan, Bulgaria, Georgia, Kosovo, Romania, Morocco, and Algeria. With 15 years of industry experience, BDB Metal upholds the highest quality standards through environmentally responsible production. The company focuses on designing and manufacturing waste containers that fit the recycling and waste collection systems of municipalities and institutions. Our factory, equipped with a skilled technical team and advanced technology, manages all quality processes from order to delivery, ensuring high-quality products for our clients. Guided by a vision of innovation and progress, BDB Metal is recognized as a reference point for both public institutions and the private sector in the field of urban cleanliness. Our facilities, with 12,000 m² of indoor space and 8,000 m² of outdoor space, and equipped with laser and plasma cutting and press brake machines, have a production capacity of up to 12,000 units per month in various product categories, serving customers both domestically and internationally.

We Care About Our Environment

As BDB Metal, we now offer comprehensive solutions for your management and cleaning needs.

By offering high-quality products to our customers, we contribute to a sustainable future.

Environmental health and order are our priorities. Waste management and recycling not only contribute to the environment and society but are also crucial for maintaining health standards.

Waste management needs continuously arise. Therefore, we are always ready to be by our customers' side and provide swift solutions whenever they need them.

Our product range includes various waste containers and waste management equipment. Our goal is to provide a clean and orderly environment for the community through our products.

At BDB Metal, we have an experienced and expert team. We work with a professional staff to deliver high-quality service to our customers. We are here to meet your waste container and waste management needs.

To provide our customers with the best service, we offer waste containers and waste management equipment made from high-quality and durable materials. With our expert team, we deliver customized solutions by considering customer needs. Additionally, we ensure customer satisfaction through prompt delivery and reliable customer support.

Strong metal structures ensure long-lasting use.

As an experienced and expert team, we prioritize customer satisfaction.

We value your time with our fast production and delivery processes.

Our products are manufactured and inspected in accordance with the highest quality standards.

By using recyclable materials, we make a positive impact on the environment.

We offer customization options based on customer requests and project requirements.

We are pleased to offer the most suitable waste container solutions to ensure a clean and orderly environment. Our expert team is here to provide you with the best service!

We Support Waste Management in Municipalities!

In modern urban life, waste management is among the primary services provided by municipalities. Our company, offering effective solutions for a clean and orderly environment, provides specialized waste container solutions to support municipalities in their waste management efforts. We offer a wide range of products to facilitate municipal waste collection and management processes. With waste containers available in various sizes, designs, and capacities, we provide solutions tailored to the needs of municipalities. Additionally, our waste container models that contribute to recycling reflect our commitment to an environmentally friendly approach.

Our company's waste containers are made from durable materials, ensuring long-lasting use. These containers are resistant to weather conditions and can be safely used in city parks, streets, squares, and other public areas.

To provide solutions tailored to municipal needs, we have an experienced and expert team. We offer professional support from the project phase through to installation and setup. Additionally, our after-sales services ensure the highest level of customer satisfaction.

Join us in alleviating the challenges of waste management for municipalities and making our cities cleaner and more livable. With our customized solutions, let's make waste management more effective and efficient. Take a step towards a clean future now!

Clean Cities Means Happy People...

Making Our Cities More Livable!

Cleanliness and order are crucial elements that determine the quality of life in our cities. Embracing the vision of clean cities and happy people, we provide solutions to make our cities more livable.

Our customer-focused approach ensures that we offer solutions tailored to each customer's needs. We provide customized waste container solutions for parks, streets, shopping centers, schools, and many other areas.

With our aesthetic and functional designs, we add a modern touch to our cities and help enhance the quality of life. Cleanliness and order are fundamental requirements for people to lead healthy and happy lives. Our waste containers are made from environmentally friendly materials and contribute to keeping cities clean and orderly by providing effective waste collection and recycling services.

Join us in realizing the vision of clean cities and happy people. Our professional team is ready to provide you with the best service in waste management.

A photograph of a park path lined with trees and a modern waste container. The path is paved and leads through a lush green area with many trees. In the foreground, there is a modern, cylindrical waste container with a lid that is slightly open. To the left of the container is a blue and green sign. In the background, there are tall buildings, suggesting an urban park setting.

The Key to Keeping Green Areas Clean

Parks and gardens are areas where residents breathe and relax. Keeping these areas clean and orderly is not only important from an aesthetic perspective but also a part of an environmentally conscious approach.

Our company produces a range of urban furnishing elements for parks and gardens in various sizes and designs. These aesthetically appealing products ensure waste collection without disrupting the natural beauty of parks and gardens. Additionally, our containers, made from durable materials, provide long-lasting use against external factors.

With an environmentally friendly and sustainable approach, our company offers products that contribute to recycling. This helps prevent waste from harming nature and supports the efficient use of resources.

Our waste container solutions, ideal for park and garden management, stand out for their low maintenance requirements. We also offer containers in various colors and designs to suit any aesthetic preference.

If you believe in the importance of keeping your parks and gardens clean, contact us for the right waste container solutions. Our professional team will help you find the best solution tailored to your needs.

Our Vision Is Zero Waste

Environmental awareness is increasing in today's world, and sustainability principles are becoming core priorities for businesses and society. As a company supporting the zero waste vision, we offer eco-friendly and effective solutions in waste management.

Our company produces waste containers designed to play a crucial role in achieving zero waste goals. With containers made from recyclable, renewable, and environmentally friendly materials, we ensure the reduction of waste and promote recycling.

Adopting the zero waste principle, our company strives to minimize environmental impact throughout all processes, from design to production. Our waste containers are known for their durability and long-lasting use, while being made from recyclable materials to ensure waste management without harming nature.

Join us in achieving zero waste goals and protecting our environment. With our customized solutions, let's make waste management more sustainable and effective.

Waste Container

The Top Solution for Those Seeking Durability, Affordability and Urban Aesthetics!

Galvanized waste containers are an ideal solution for eco-friendly and durable waste management. Galvanization is a protective coating formed by zinc plating on a steel surface, which makes the waste containers resistant to rust. With these properties, galvanized waste containers offer long-lasting use and resilience to outdoor conditions.

Galvanized waste containers are an ideal waste management solution for parks, streets, avenues, shopping centers, schools, and many other public areas. As a durable, eco-friendly, and aesthetically pleasing option, galvanized waste containers play a significant role in maintaining cleanliness and order in cities.

Galvanized steel is resistant to outdoor conditions. It withstands sunlight, rain, snow, and other weather elements, which ensures the long-term durability of the containers.

Galvanized waste containers are made from recyclable materials. Additionally, due to their long-lasting nature, they do not need to be replaced frequently, contributing to the efficient use of resources.

Galvanized coating prevents the formation of iron oxide by covering the steel surface with zinc. This feature ensures that the waste containers are long-lasting and durable.

Galvanized waste containers have a modern and stylish appearance. Their clean and shiny surface adds aesthetic value to their surroundings.

Above-Ground Waste Container

The Preferred Solution for Those Seeking Durability, Large Capacity, Affordability, and Urban Aesthetics!

Above-ground waste containers are an ideal waste management solution for parks, streets, shopping centers, schools, and many other public spaces. As a durable, eco-friendly, spacious, and aesthetically pleasing option, these containers play a crucial role in maintaining the cleanliness and order of cities.

The above-ground waste container made of galvanized steel is resistant to outdoor conditions. It withstands sunlight, rain, snow, and other weather elements, ensuring the container's longevity and durability in various environments.

Galvanized coating protects the steel surface by covering it with zinc, preventing the metal from oxidizing. This feature ensures that waste containers are long-lasting and durable, even under harsh conditions.

Above-ground waste containers are made from recyclable materials. Additionally, their long-lasting nature means they don't need to be frequently replaced, contributing to the efficient use of resources.

Galvanized waste containers feature a modern and sleek design. Their clean and shiny surface adds an aesthetic touch to their surroundings.

Trash Cans

The Priority Solution for Parks and Gardens!

Your gardens, parks, and sidewalks are the areas where you spend the most time and find peace. Therefore, a clean and organized environment is crucial both aesthetically and for health reasons. Outdoor trash bins are practical and effective solutions that help keep our surroundings clean and organized at all times.

Outdoor trash bins provide a way to collect daily waste, food scraps, and other litter that accumulates in areas such as parks and gardens in an organized manner.

It is resistant to various weather conditions such as rain, snow, and sun; it has rust-resistant and waterproof features.

Buckets made from materials such as steel, durable plastic, or composite offer long-lasting use.

With their natural colors and modern designs, they provide an aesthetically pleasing and environmentally friendly look for parks.

Thanks to their optionally fixed structures, they do not topple due to natural conditions or human intervention, ensuring safe usage.

Optional Not Available Available

Thermowood

Thermowood is wood that has been subjected to thermal processing in high-insulation, massive ovens at temperatures ranging from 180°C to 220°C. During this process, steam is released into the oven to prevent the wood from cracking. This treatment reduces the moisture content within the wood to near zero and also allows for the release of chemical and harmful substances.

Thermally treated wood is found to experience significantly less warping, cracking, and deformation, allowing it to last much longer in its applications.

Impregnation

The process you're describing is known as wood impregnation or wood preservation. It involves injecting or applying a protective substance to the wood's interior or surface. This treatment enhances the wood's resistance to various harmful factors, thereby extending its lifespan.

City Aesthetics

The Address of Comfort and Elegance in the City

We bring comfort and aesthetics together for parks, gardens, and public spaces, which are indispensable in modern living.

Our benches, produced as urban furniture, are made from the highest quality materials to ensure durability over many years. We offer benches suitable for all weather conditions with our steel and high-quality natural wood options.

With our modern and classic designs that add value to our cities, we provide solutions that fit every space. Our architects and designers work diligently to ensure that each bench is aesthetically pleasing.

We adhere to our sustainability principle by using environmentally friendly materials and respectful production methods. Our benches, made from recyclable materials, are preferred by cities with environmental awareness.

With our ergonomic designs, sitting on our benches is now much more comfortable. Our parks and public spaces will become meeting points for people.

Nature is entrusted to all of us. Managing our waste correctly to contribute to nature is a major responsibility for both today and tomorrow. This is where the recycling bins provided by BDB Metal and Defense come into play! With growing environmental awareness and the need for a sustainable future, we all recognize the importance of recycling. Are you ready to explore solutions that make the recycling process easier and more effective?

Elegant and durable recycling bins that blend seamlessly with your modern living spaces. Our products are ideal for both indoor and outdoor use, enhancing your environment with their stylish appearances.

Made from fully recyclable and eco-friendly materials. In our production process, we always prioritize our mission to protect nature. By offering environmentally conscious products, we contribute to reducing the carbon footprint.

Recycling bins feature a modern and stylish design. With their clean and shiny surfaces, they add aesthetic value to their surroundings.

With a variety of color options and categorized designs, you can easily separate your waste. Our bins feature marked compartments for different types of waste, such as organic, paper, plastic, and glass, making recycling more practical than ever.

Rubble Container

High Quality Solution for High Volume Seekers

In construction, renovation, gardening, or industrial projects, accumulated debris and waste can make your work areas cluttered and hazardous. That's where we come in! With our professional debris container services, we ensure your projects proceed smoothly and cleanly.

We enhance job safety by ensuring debris and waste are collected in an organized manner, making your work areas more orderly.

We save you time and reduce costs by handling the collection and disposal of waste.

We provide environmentally friendly services using sustainable waste management and recycling methods.

We facilitate the rapid and efficient collection of construction waste such as concrete, stone, bricks, and other materials based on the size and needs of your projects.

We collect debris, furniture pieces, and old flooring and wall coverings after renovation work in your home or workplace, helping you quickly restore your living space to its original state.

We handle plant waste, soil, grass, and other natural debris generated during garden or landscaping projects, keeping your garden clean and organized.

We collect heavy and voluminous industrial waste from factories and production facilities, offering tailored solutions to simplify industrial waste management.

Vehicle Bodies

The Solution for Those Seeking Quality and Volume in Garbage Truck Bodies

The cleanliness and order of cities are crucial for the sustainability of modern living. As a company, we produce the most durable and efficient garbage truck bodies for municipalities and private cleaning companies that take on this important task. With years of experience and technical knowledge, we contribute to keeping your cities clean and organized.

We produce high-quality and durable garbage truck bodies. With our wide range of products and custom production options, we offer the most suitable solutions for municipalities and private cleaning companies.

Our garbage truck bodies ensure that waste collection operations are completed with fewer trips by providing maximum carrying capacity. This helps save both time and fuel.

Each garbage truck body is meticulously manufactured to high standards using modern and innovative production techniques. We perform quality control tests at every stage of the production process to provide you with the most reliable products.

By using the highest quality materials in our garbage truck bodies, we offer long-lasting and durable products. Our bodies, produced with high-strength steel and special alloys, perform exceptionally even in the toughest conditions.

Nature Is In Our Hands

Nature is our most precious treasure. With every breath we take, every sip of water we drink, and every sunrise we greet, it offers us the gift of life. But this gift can slip away from us if not protected.

Our daily actions and choices shape the future of nature. Plastic waste, unnecessary energy consumption, habits that destroy forests—nature didn't ask us to do these things; we chose them. Yet, there is still time to make the right choices and save the future.

Give recycling a chance. Use your energy efficiently. Protect natural resources. Nature is not just a resource; it is the foundation on which we build our future. Protecting nature is in our hands. Our choices will determine the legacy we leave for our children.

Remember, nature is not just for us. Future generations also have a right to this world. If we want to leave them a green world, clean air, and clear water, we must act today. Because nature is in our hands, and protecting it is each of our responsibilities.

**Take care of nature, take care of the future.
Because nature is in our hands!**
